Step 1: Write your ideas for your comic
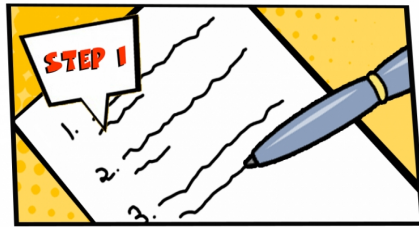

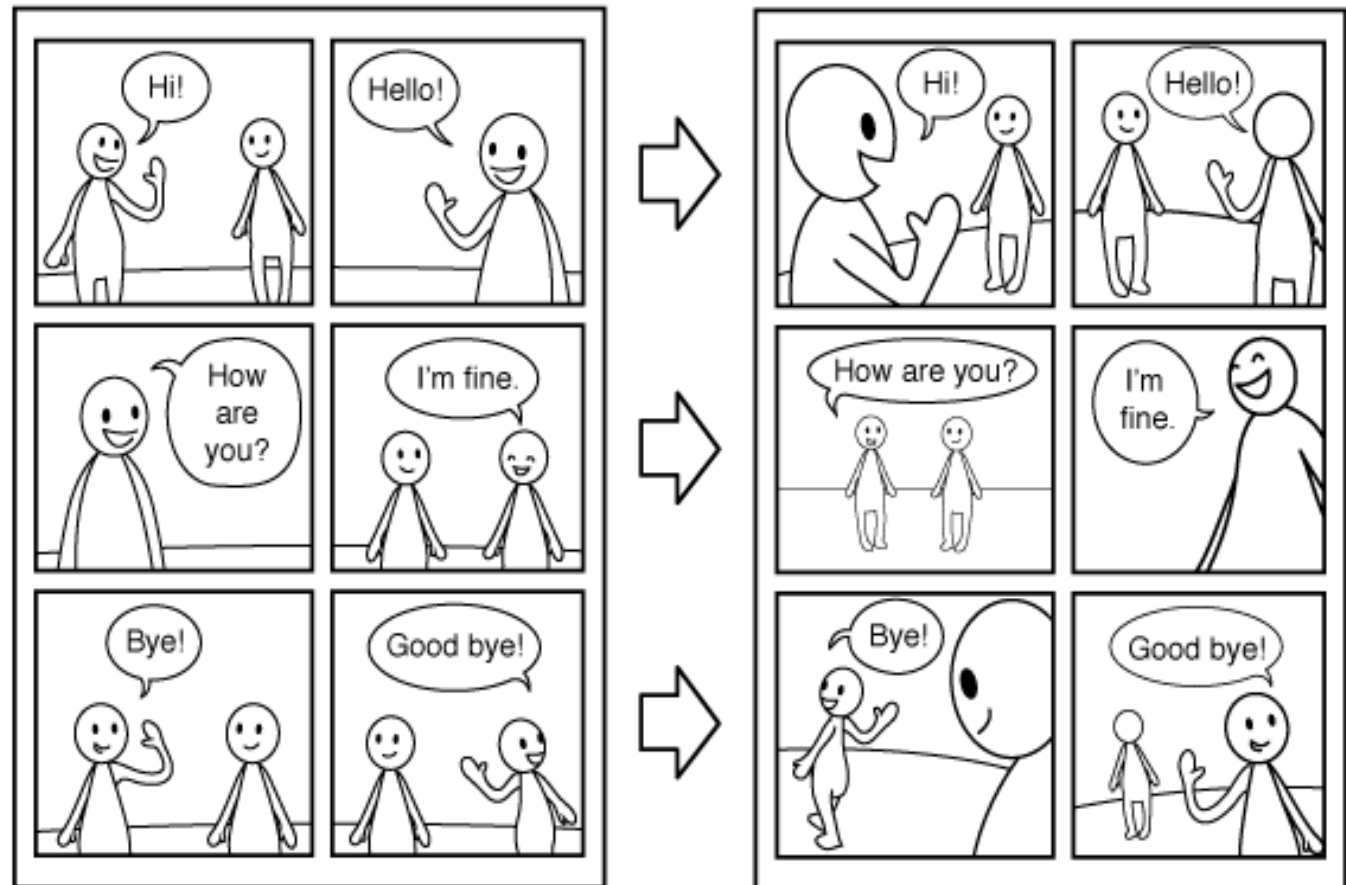

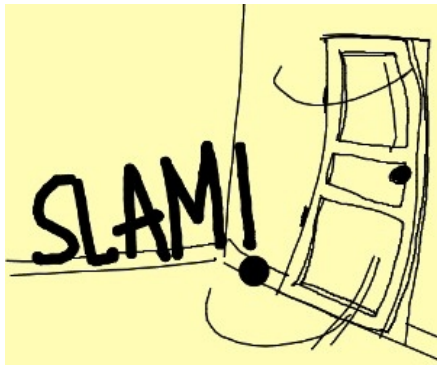

A comic strip is no difference from writing a short story. It still needs a beginning, middle and ending.
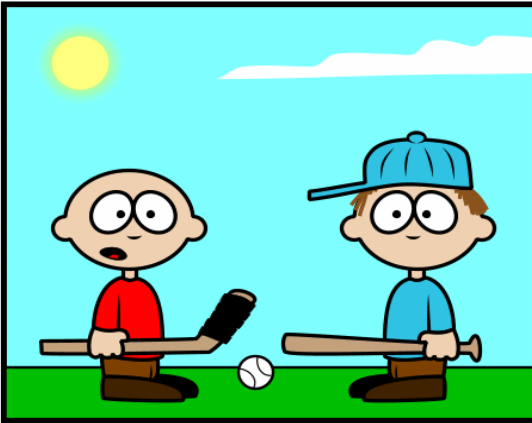

Step 2: Draw a simple sketch with a pencil

Use basic shapes to draw out your characters. Sketch in the speech bubbles and sound effects. Use a pencil.
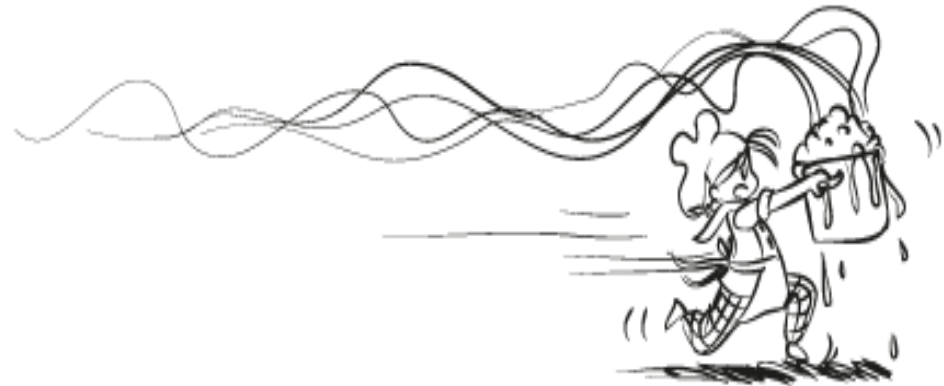

Step 3: Add details

Add any extra details, such as facial expression and movement lines. And also draw in the background for each frame.

facial expression

movement lines

background

One day, I'll go into space ...

And the next day, I'll be back home ...

Step 4: Go over your comic in pen

Now, you can finally use a pen or a felt-tip pen to go over your pencil drawings and rub out any pencil lines.
