### Animal Dominoes - How to Play

1. Every player gets seven dominoes.
2. Decide who plays first.
3. Lay a random domino on the table to start.
4. Lay a matching next to the first domino (it doesn't matter which end). Make sure like picture/word tiles are always touching.
5. Pick from the pile if you don't have a domino that corresponds to the ones on the layout. Keep those dominoes concealed from your opponent(s).
6. Pass if no more dominoes are left in the pile.
7. Win the session if you're the first person to run out of dominoes.
8. End the session if everybody passes, in which case the winner is the person with the lowest number of dominoes.
9. Count your score by the number of domino tiles remaining in your hand.
10. End the game if someone reaches 50 (or more, or less) points in a game. The lowest score wins.

**Have fun!**
